

Custom Applications

The following items are custom web-based applications that we have created specifically for the respective client's needs.

Custom Content-Management System (CMS)

- Client:** Dubuque Community School District
- Status:** Being readied for deployment
- URL:** N/A
- Technology:** PHP / MySQL, Code Igniter, JavaScript (jQuery)
- Notable Features:**
- Multi-level, multi-role access restrictions.
 - Custom-built page template system.
 - Automated nightly file cleanup utility.
 - Custom-built navigation menu editor.
 - Automated action log (audit trail; who did what and when).

The screenshot shows the Administration Control Panel for the Dubuque Community School District. The page title is "Dubuque Community School District » Administration Control Panel". Below the title, it indicates the user is logged in as Justin Rickman and provides links for Logout, Change Pass, Run System Cleanup, Action Log, and View Site. A left-hand navigation menu lists various administrative functions such as Dashboard, KC Finder, File Manager, Menu Editor, CSS Editor, Users, Departments, Templates, Pages, Alerts, Admin Settings, Staff Settings, I.T. Department, Settings, Human Resources, and Secretaries Settings. The main content area, titled "Dashboard", contains a welcome message and two tables. The first table, "Templates flagged for deletion", is empty with the message "No templates flagged for deletion." The second table, "Pages flagged for deletion", is also empty with the message "No pages flagged for deletion." At the bottom of the dashboard, it states "CMS Built by The Stevens Company".

Fundraising / Event Management Application

- Client:** Multiple
- Status:** Online
- URL:** http://www.gabrielsangels.org/events_calendar.php (one example)
- Technology:** PHP / MySQL, Yahoo! User Interface library, AJAX
- Notable Features:**
- Custom-built application handles events management, registration, and fundraising.
 - Payment of donations and registration fees seamlessly integrated into the application and is handled through the Transaction Central gateway.
 - Back-end shows reports of who registered for each event, who raised funds for each event, and how much total was collected.
 - Individual event participants can have their own mini “fundraiser page” within the system, showing a picture, their name, their fundraising goal, and a progress bar showing progress toward their goal.
 - Administrators can download CSV files containing registration data.
 - This particular installation of this system has collected over \$100,000 in charitable donations.

Leslie and Bailey

Once a year I ask for your help. On Fri., Nov. 5th I will spend the day hacking balls on the golf course to raise money to help abused, neglected and at-risk children. By sponsoring me for this event, you can help me reach my goal of \$2,500. Please give whatever you can, everything helps. Thanks in advance for your support of this mission and organization that is very near and dear to my heart.

My Progress

\$ 2,127.00 of \$ 2,500.00 (85%)

Mark Sonnenklar	\$150.00
Leslie Sonnenklar	\$100.00
Beth Scheel	\$100.00

Auto Dealership Inventory System

Client: Multiple
Status: Online
URL: www.danddautoparts.com (one example)
Technology: PHP / MySQL
Notable Features:

- Custom-built system for auto dealers to display vehicles on their website.
- Can be configured to accept incoming data feeds from, or export data feeds to, third-party agencies such as Cars.com and AutoTrader.
- We currently have a number of dealers using this system, which has earned us Preferred Service Provider status with Cars.com.
- Dealers can upload an unlimited number of photos for each vehicle, which are neatly displayed on the vehicle's detail page. Photos enlarge when clicked.
- Can be configured to have an admin section to allow dealer staff to change details for each vehicle, or be entirely hands-off and have the data populate automatically via data feed.
- Custom-built search function allows visitors to search on make, model, year, price, and miles, or any combination thereof.

Real Estate Listing System

- Client:** Multiple
- Status:** Online
- URL:** www.neweagle Realty.com (one example)
- Technology:** PHP / MySQL, XML, JavaScript (jQuery)
- Notable Features:**
- Custom-built real estate listing system, completely hands-off, gets data from local MLS.
 - Data is imported automatically every night.
 - Reads XML data feed and adds new data to the database, downloads photos if available.
 - Featured properties display listing agent's contact information.
 - Photos enlarge when clicked, using a neat "lightbox" special effect.
 - Properties are sortable by price, build date, and listing date.

Secure File Transfer System

- Client:** Multiple
- Status:** Online
- URL:** www.tsmdubuque.com/file-transfer.php (one example)
- Technology:** PHP, ReCaptcha™
- Notable Features:**
- Custom-built solution to allow customers to upload files.
 - Detects file type and prevents upload of files that could potentially be harmful.
 - Multiple files can be uploaded simultaneously.
 - Files are stored in a password-protected directory that only the client has access to.
 - Client receives an Email notification when a file is uploaded, containing a link to download it.
 - ReCaptcha™ technology helps prevent SPAM submissions.
 - Back-end administrative interface allows you to manage and delete files when needed.
